

2018

**Anandamahidol Foundation
Scholarship Recipient**
(Royal Family and Thai
Government Scholarship)

Awarded to 7 students annually,
and only one per field

2021-2026

Ph.D. in Agricultural Economics,
Purdue University, USA

Dissertation: Essays on Tariff and
Non-tariff Measures: Product-
Level Estimation and Dynamic
CGE Policy Analysis

2013-2016

B.Sc. in Agricultural Economics,
Kasetsart University, Thailand
Summa cum laude
Valedictorian

2019-2021

**M.Sc. in Agricultural
Economics, UC Davis, USA**

Thesis: The Impact of the
ASEAN Economic Community
on ASEAN Trade and Welfare

ECONOMIC BACKGROUND

- **Center for Global Trade Analysis (GTAP)**
Research Assistant: input-output tables, labor data processing, domestic support data, and trade flow data
- **Lead Economist**, GTAP–World Bank projects
 - CGE analysis of U.S. reciprocal tariff policies on global economy
 - CGE analysis of U.S.–Middle East and North Africa policy retaliation
- **Lead Economist**, GTAP–Brookings Institution project
- **Project Lead**, GTAP–Rosen Center for Advanced Computing projects:
 - Machine learning-based CGE results analysis
 - AI-assisted CGE simulation web application
- **Economist**, GTAP–UNDP Project (*under negotiation*)
 - CGE analysis of carbon-emission impacts on trade

7+ years

Policy Impacts & Economic
Integration Research

4+ projects

Intergovernmental
projects

7 working papers

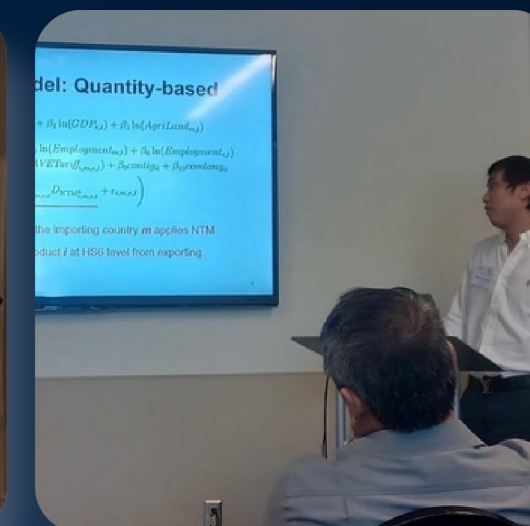

All focused on policy analysis.
Two under peer review at
JGEA and The World Economy

3 book chapters

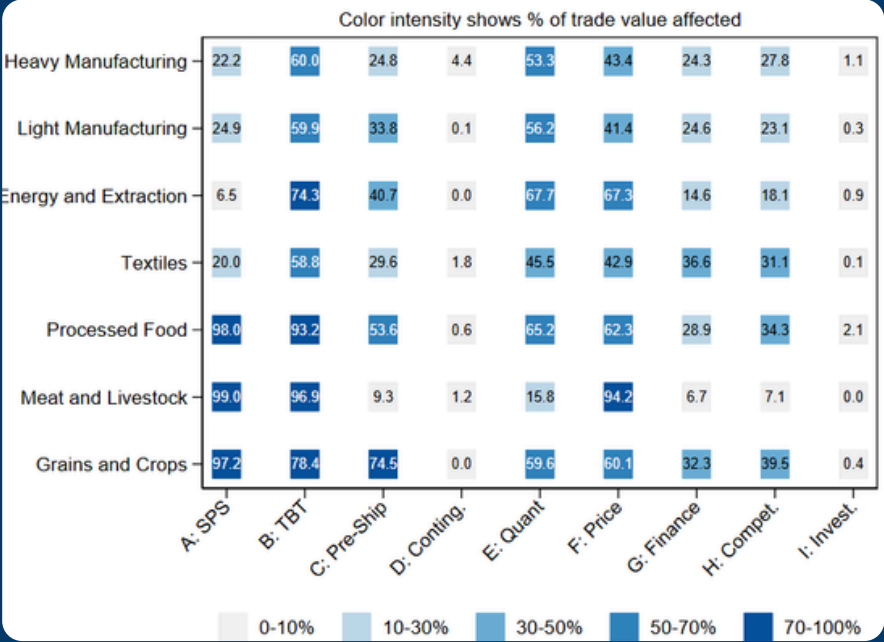

In the GTAP Data Base
Version 12 documentation

6+ Intl. Conference

The U.S., the Philippines, Rwanda, Thailand, and Japan;
all funded through selected-paper sponsorships

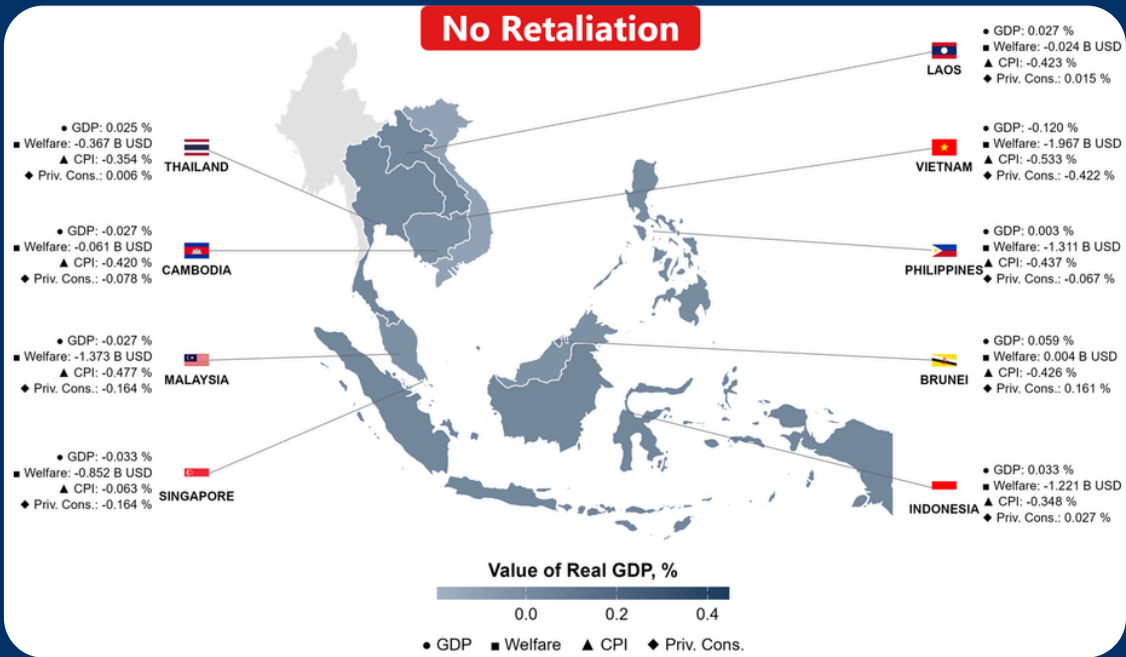

Quantitative Modeling

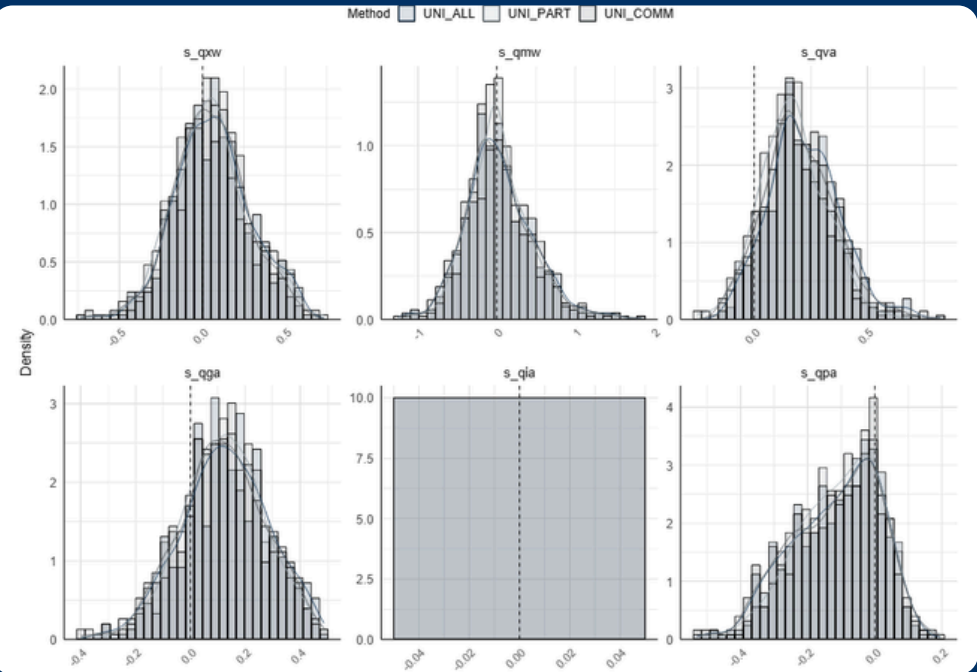

Gravity Estimation: NTM ad valorem equivalents from ASEAN panel data using structural trade cost indices, Bayesian Information Criterion, and bootstrap-based policy selection

CGE Modeling

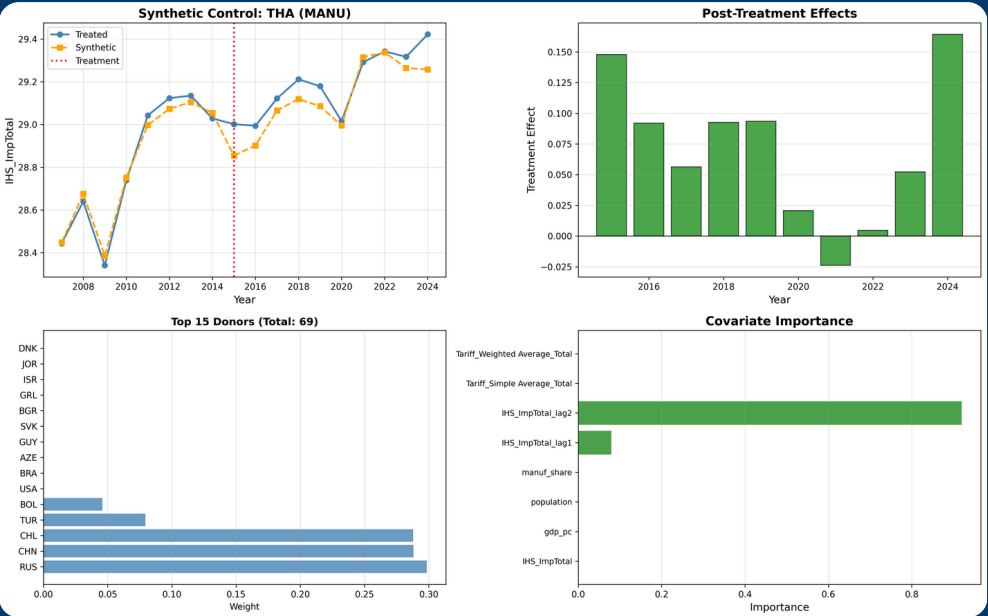

Policy Simulation: Dynamic and static GTAP-CGE modeling using GAMS and GEMPACK; authored *GTAPViz*, an R package for results visualization

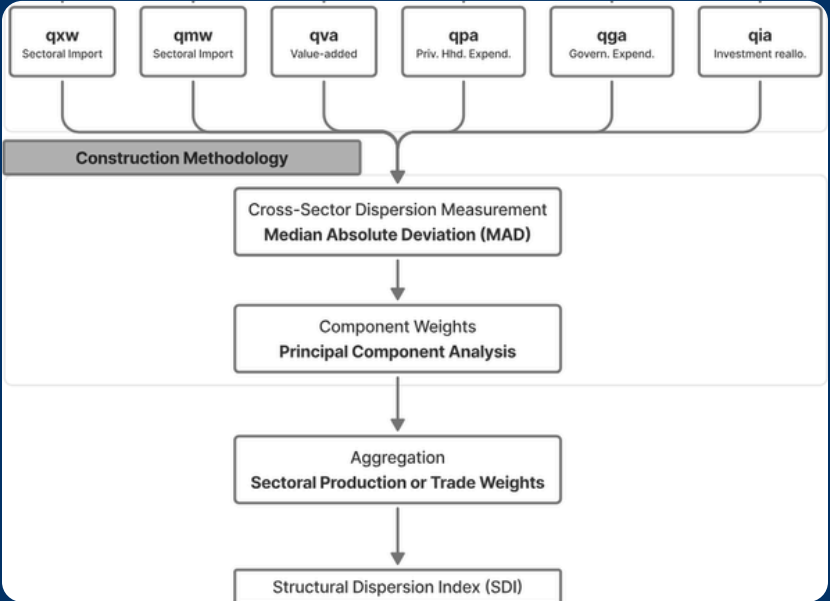

Model Robustness

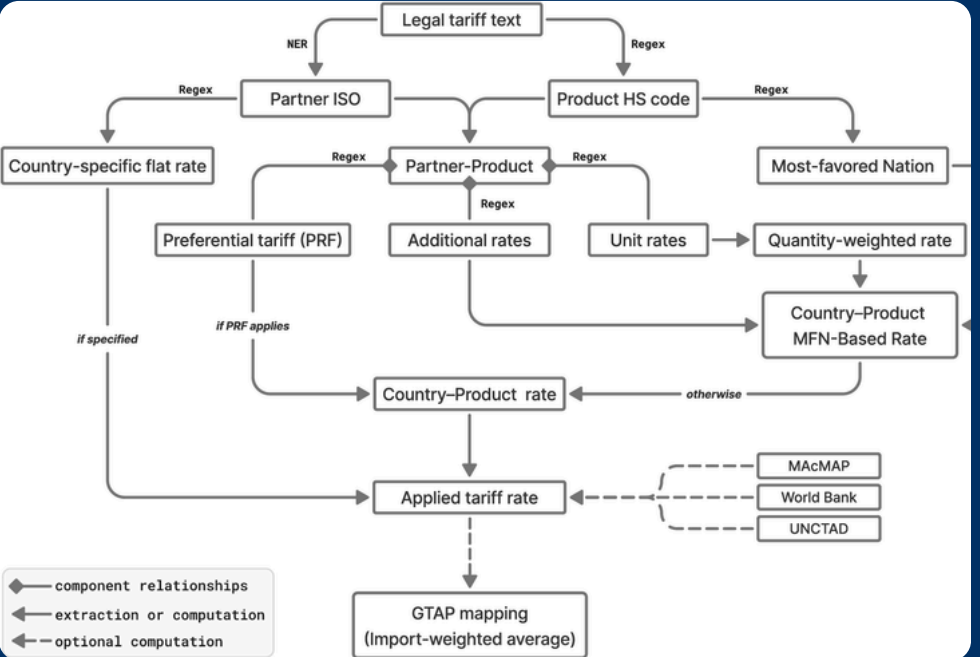

Policy Shock Design: Monte Carlo simulation to assess how alternative shock specifications affect outcome distributions

Counterfactual Analysis: Quality-penalized donor-pool selection for SCM using data-driven structural similarity and dynamic predictive fit

Sectoral Policy Analysis: Structural Dispersion Index summarizes multiple CGE indicators using weights from principal component analysis.

Natural Language Processing (NLP): Extract and convert regulatory policies into economic model inputs

2018

Market Data Analyst (U-Fresh) Unilever Thailand

Brand Development: Supporting Knorr's marketing strategy using big data

2020

Co-Founder & Chief Financial Officer AMATA Production Co., Ltd., Thailand

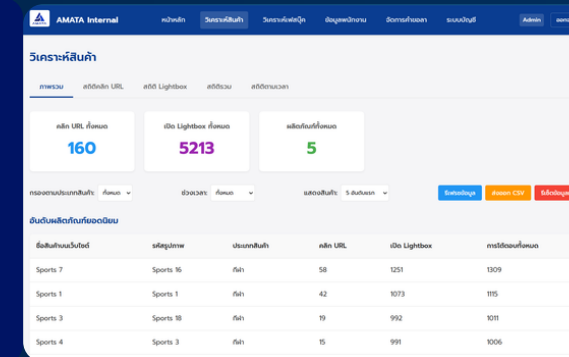

Financial planning, pricing strategy, and production optimization; grew annual revenue from \$30K to \$810K in five years

Welcome to AMATA Production

Your one-stop smart printing solution

Sports Polo Shirts Review About Us

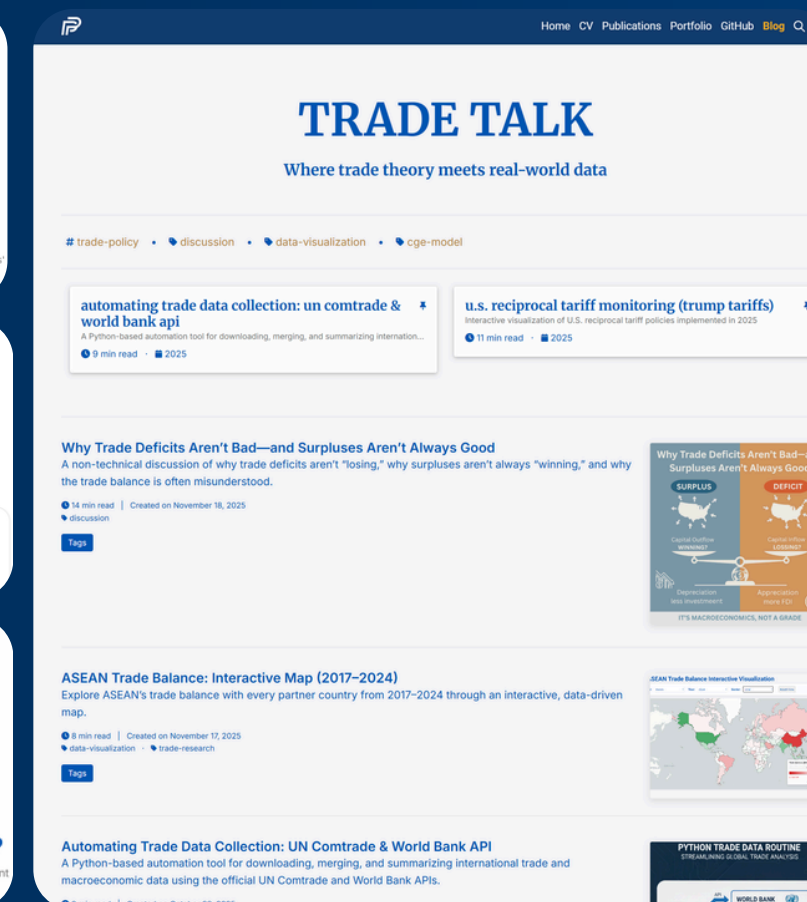

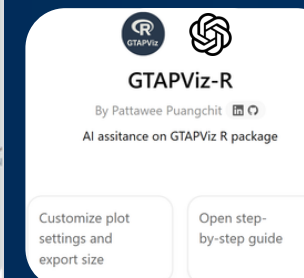

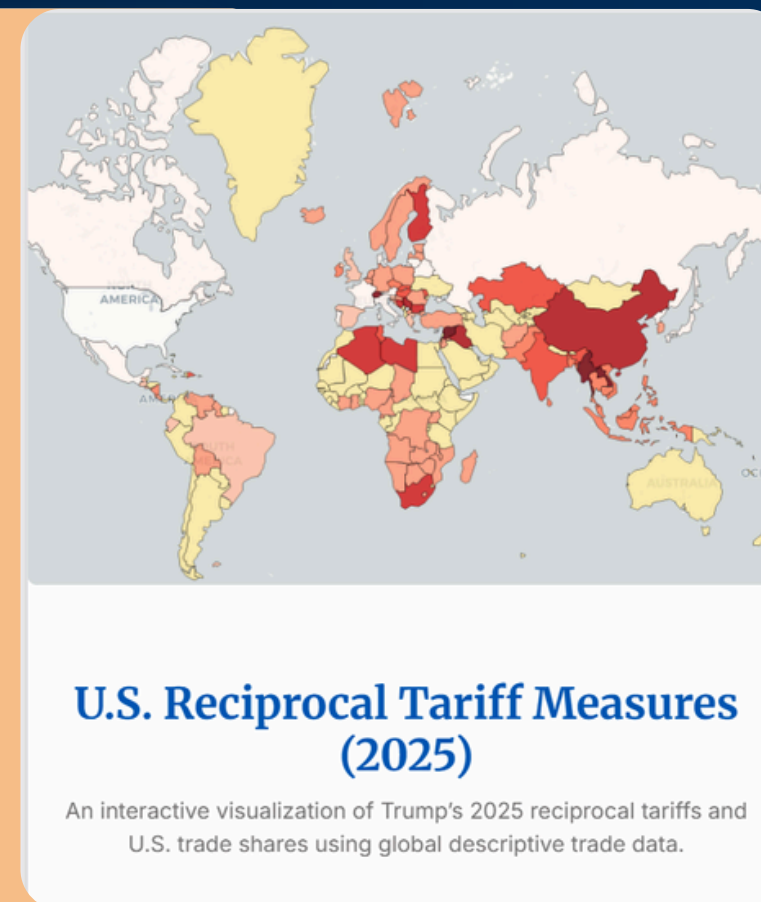

2021
TO
2025

PHD

Published Tools and Data Science Projects

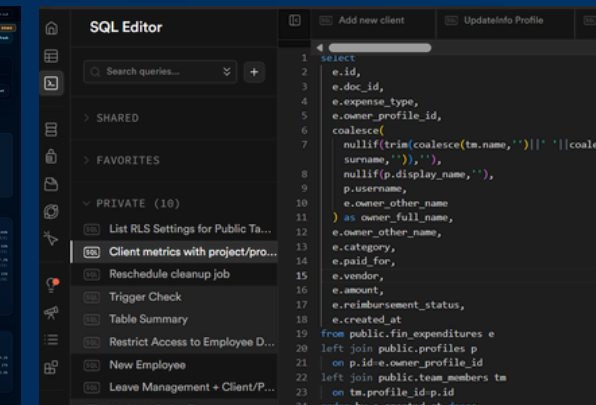

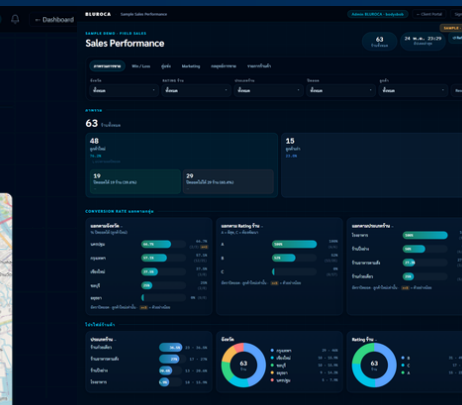

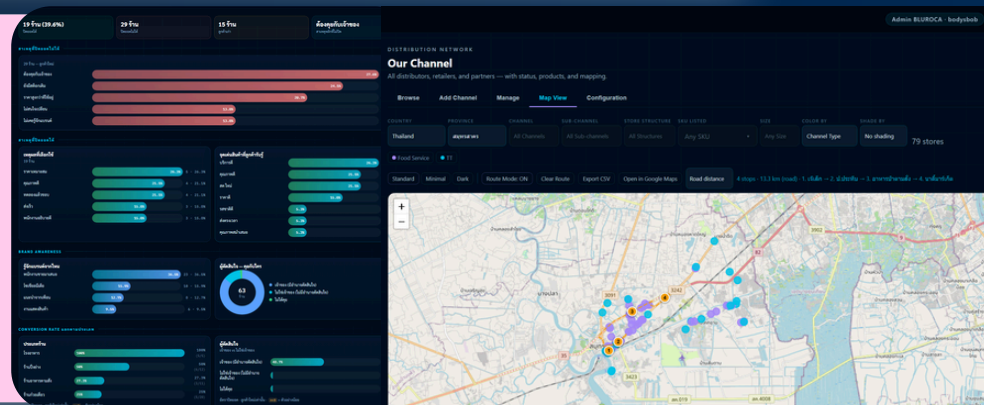

- A **real-time monitoring dashboard** for U.S. reciprocal tariffs
- HARplus, an **R package** on CRAN
- GTAPViz: CRAN **R package** with **custom GPT support**
- A **Python** script for the UN Comtrade API
- A **Python** script for NLP sentiment analysis
- Authored the **TRADE TALK blog** (TH/EN version)
- Sole developer of four **HTML/JavaScript**-based websites:
 - www.pattawee-pp.com
 - www.bluroca.com
 - www.bluroca.internal.bluroca.com
 - www.amataproduction.com

2026

Co-Founder & Head of Data Analytics BLUROCA Co., Ltd., Thailand

Data-driven logistics business:
SQL/PostgreSQL data systems,
and **interactive executive dashboards**

WHAT I BRING TO THE ASIAN DEVELOPMENT BANK

60%

Economist

- Rigorous economics research background
- International project experience
- International conference presentations
- Publication-quality research papers

References

Dr. Erwin Corong,
Deputy Director of GTAP; PhD Committee Member

Dr. Dominique van der Mensbrugghe,
Former Director of GTAP, PhD Committee Chair

30%

Data Scientist

- **Expert:** R, Python, JavaScript, GEMPACK, Stata, VBA, SQL, PostgreSQL, HTML
- **Advanced:** GAMS, Julia, Fortran
- Machine learning: supervised and unsupervised models
- AI-Augmented Workflows: custom GPTs, GitHub Copilot, Claude Code, and VS Code workflows
